ADVANCED DELIVERY

LIPOSOMAL

CURCUMIN/ RESVERATROL

6 FL OZ/180 ML PER BOTTLE. SERVING SIZE: 6ML
30 SERVINGS PER BOTTLE
DELIVERING LIPOSOMAL CURCUMIN AND RESVERATROL

- ✓ Cerebral blood flow¹
- ✓ Inflammation support²
- ✓ Moods³
- ✓ Cognition⁴
- ✓ Digestion^{5,6}
- ✓ Microbial infection^{7,8}
- ✓ Healthy liver⁹, kidney¹⁰, eye function¹¹

SCIENCE & BENEFITS

Curcumin is the yellow-orange inner part of the turmeric root, rich in phytonutrients. These phytonutrients are master anti-oxidants that get to work cleaning up free radicals from our cells, increasing cerebral blood flow¹, as well as soothing swelling and inflammation.

While turmeric has a long history of use for healing for nearly 4000 years, it's notorious for being difficult for our cells to absorb. By consuming the turmeric root or taking traditional supplements, health benefits may not be fully realised. When encased in a protective liposomal bubble, these powerhouses of phytonutrients target delivery to the cells, rather than being lost in digestive juices and excretion. Using turmeric or curcumin in traditional capsules or powders, some people find it irritating to their stomachs, but in protected liposomal form, digestive ill effects may lessen. Some people also find the taste of the turmeric to be unpalatable, but in natural citrus flavoured liposomes, this may encourage more frequent use to reap greater health benefits.

Resveratrol is the antioxidant found in many berries, grapes and wine. This may be beneficial for heart health, insulin support, bone health, blood pressure, and weight management. This is another phytonutrient that has been known to have difficulty with bioavailability, but with liposomal delivery which protects the phytonutrients from the effects of stomach acid, we may target this nutrient delivery to our cells.

CURCUMIN/RESVERATROL

TECHNICAL DATA SHEET

SUPPLEMENT FACTS

6 FL OZ/180 ML per bottle. Serving Size: 6ml. Servings per bottle: 30

	Per Serving	%DV
Curcuminoids	200mg	*
Resveratrol	75mg	*

*Daily value not established

PRODUCT DESCRIPTION

Water soluble curcumin/resveratrol is an orange, milky liquid that contains curcuminoids, resveratrol and natural flavours. It will mix into any drink for you to enjoy and promote your health.

INGREDIENTS

- Phosphatidylcholine (from non-GMO sunflower oil) -glycerin complex, non-GMO oleic acid and natural flavours
- Other Ingredients: purified water, natural flavours, xanthan gum, gum arabic, potassium sorbate
- Natural flavours are fruit and berry extracts and contain no MSG & no tomato
- Vegan - absolutely no ingredients from animal origin are in this product
- GMO free - manufactured using only non-GMO ingredients that are found in nature
- Free from common allergens

SUGGESTED USE

Take 6 millilitres daily (just over 1 teaspoon) or as directed by your healthcare professional. For children over the age of 4, add one-half of a teaspoon to their favourite beverage.

PHYSICAL PROPERTIES

Solubility: Will disperse in any liquid drink (e.g. water, juice, smoothies)

Consistency: Medium viscosity liquid

Colour: Orange

Storage & Handling: Store in cool dry location, refrigerate after opening, use within 45 days of opening

Irradiation: None (raw materials nor finished product)

Water: Meets pharmaceutical requirements with conductivity < 0.07 µS/cm

Quality: Manufactured by a GMP certified company

DISCLAIMER: Always consult with a doctor/qualified healthcare professional prior to taking any dietary supplements. LipoRevolution™ products do not replace the advice of your medical professional. LipoRevolution™ does not attempt or intend to treat, diagnose, cure or prevent any medical disease. Taking dietary supplements does not substitute for a healthy diet. Always check for medication/supplement interactions with your doctor prior to taking dietary supplements.
